

Shajahan Begum Haja

Curriculum Vitae

I hold a Master of Philosophy degree in Education and have been taught with pure and inter disciplinary mathematics in several sectors in India. My academic excellence established through seven degrees is balanced by success as a teacher educator and administrator of professional extension activities. I am a teacher educator with four dimensions: Teaching, Research, Extension and ICT.

I have been teaching since 1999 and each year I organize seminars, workshops for the benefit of school children, in-service teachers, and prospective teachers. Model Mathematical Olympiad, Mathematical Instructional Aids Exhibition and Poster Contest are some of my new ventures tried with different learning groups. I have guided pre-service teachers in their educational projects. I have acted as a resource person in seminars and workshop of academic and social nature.

I was selected as a Ford Fellow in 2002 as result of which I did my masters in mathematics education at University of London in the United Kingdom. My experimentation with innovative ideas in mathematics education received appreciation from the national and international mathematics community. My papers based on these experiments are published in reviewed national and international conference volumes such as ICME 10 - Copenhagen (July 2004), PME 28 - Bergen (July 2004), MERGA 28 - Melbourne (July 2005), and PME 29 - Melbourne (July 2005). I also

participated in a Leadership Institute for Social Justice Camp (Aug 2004) organised by the Ford Foundation conducted at Kontakt der Kontinenten, the Netherlands.

I have worked for both government and private institutions where my work has always been centred on effective teaching and community development. My experiences have led me to work successfully with people from different cultures. I work independently but enjoy working with motivated team members.

Thanking you.

Yours truly,
